URGE CONSERVATION OF GAME

Wild Life of Country Declared to Be Disappearing Before 5,000,000 Hunters.

Artificial propagation as a means of guarding against the extinction of American game and the need of further protective legislation were discussed at the first national conference on American game breeding and preserving at the Waldorf-Astoria, the New York Times states. Many important facts and statistics were produced to show the importance of renewing the supply of birds and other forms of wild life that fall prey to 5,000,000 game hunters in this country.

In the last five years, it was stated, the conservation commissioners of New York distributed 75,000 eggs and 20,000 pheasants to raisers of game. These were given free from the state farm at Shelburne, south of Utica. More than 250,000 hunting licenses were issued in the state, netting an income of \$260,000. These hunters killed about 15,000 deer, but according to H. T. Rogers, superintendent of the state farm, there are at present more than 30,000 deer in the state, the largest number on record.

It was also shown that 500,000 shot guns and rifles were sold and 1,000,000 cartridges used in the country. This number is exclusive of the muzzle-loading guns, which, it is estimated, would add 250,000,000 charges. Throughout the United States 1,500,000 hunters' licenses were issued last year, while the department of agriculture estimates that 5,000,000 men shoot game. To accommodate this immense army of hunters farms are being established to replenish the stock of pheasants, partridges, ducks, deer and other native game.

Why a Cement Hog Wallow?

We will admit that there are not many cement hog wallows in use—not just now. But they are coming fast, just as fast or faster than sanitary hog houses, feeding floors, and silos.

A few years ago a silo was a curiosity. A feeding floor was almost unknown and any old shack was good enough for hogs.

But the farm without good hog equipment, is soon going to be the curiosity and cement hog wallows will play a big part BECAUSE hogs that are kept clean develop more rapidly, keep free from disease far easier and cost the least to raise and market and bring the top prices and big profits.

A cement hog wallow is easy to build, doesn't cost much and lasts forever. Better figure on putting one in your hog yard this year while cement is cheap.
